Evostar 1

The stylish Travel System that grows with the family.

Approx. 6 months – 4 years
20 - 55 lbs

The Evostar 1 was designed specifically for the versatile needs of modern, style-conscious families. In combination with the infant car seat Evolution Pro 2 the Evostar 1 transforms into a perfect Travel System from birth, as the infant car seat is a convenient alternative to the carrycot through its lie-flat function.

The Evostar 1 grows with the family and offers a unique and innovative solution for the transport of two babies or toddlers. With a few simple steps it can be quickly and easily converted into a Travel System for siblings or twins. Perfect for families with a dynamic lifestyle. The comfortable seat units can

be combined individually according to the family's needs, saving space on a single frame.

The agile and robust all-rounder individually adapts to every situation in the family's daily life. Equipped with durable "Tru-Ride® Technology" tires made of PU, all-wheel suspension and swivel front wheels, the Evostar 1 can effortlessly maneuver across all surfaces.

The ergonomically adjustable handle bar with PU leather makes every trip a pleasure. The stroller is folded quickly and easily thanks to the innovative folding mechanism. Compact and freestanding, the Evostar 1 can be stowed away perfectly.

We love our kids.

Features

1 Ergonomic handle bar & simple folding mechanism

The ergonomic handle bar is made of PU leather and with five different height positions can be individually adapted. The practical folding mechanism of the Evostar 1 is easy to initialize with a turn of the handle bar downwards. With a second handle on the basket the stroller can be pulled up into a self-standing position with a compact folding size.

2 Comfortable & individually adjustable seat unit

The flexible seat unit can be used forward facing and rear-facing and be adjusted with one hand into three different recline positions to ensure the perfect sitting or lying position of the child. Thanks to the four-step adjustable leg rest the child sits comfortably in every position.

3 Large sun canopy

The large sun canopy adjustable in three positions protects perfectly from sunlight.

4 5-point harness system adapting to the size

Depending on the size of the child, the harness system adjusts perfectly into three different height positions. The shoulder and waist straps are equipped with soft pads in the sensitive areas. These are washable at 30°C.

5 Generous storage space

The spacious shopping basket is easily accessible from all sides regardless of the position or the direction of the seat unit and offers optimal storage space. The pocket at the back of the seat offers extra space with quick access. Children can store their personal belongings in a small compartment hidden under the leg rest.

6 Durable & sturdy tires

The Evostar 1 is equipped with "Tru-Ride® Technology" tires with PU (polyurethane). These tires are not only much sturdier than standard tires but also longer-lasting, as the surface is hardly worn down even after a long time in use. They are maintenance-free and puncture-proof. With all-wheel suspension and rotatable front wheels, which can be fixed in position if needed, the Evostar 1 offers excellent maneuverability on all surfaces.

Tandem function: Can be converted quickly and easily into a stroller for siblings or twins

The Evostar 1 was designed to be particularly flexible, so it can grow effortlessly with the family. With the tandem accessories sold separately, it can quickly and easily be converted into a stroller for siblings or twins. Whether up or down, facing towards the parents or facing the world, two babies or toddlers can be transported conveniently but at the same time in a small area on a single frame.

Only a few clicks are needed to position the seat units and infant car seats in a variety of different combinations.

The versatile and compact all-rounder adapts to every situation perfectly with its small width (only 23") and can be easily maneuvered in the city.

Colors & Designs

The Evostar 1 is characterized by both its modern, innovative design and the high quality and functional materials used. Particularly soft yet durable materials are combined with modern, silver

applications. Thanks to the characteristics of the fabrics, the luminous tone of the colors is preserved for a long time.
